SUBJECT: Helicopter Operations

This memo covers helicopter operations at UAMC for the month of December. During that time frame, there were 89 medical flights, compared to 117 last month and 89 a year ago.

There were six observed violations of the no-fly zone this month. In one instance, the pilot stated he had violated due to high winds. In three of the remaining instances, the officer on the pad spoke to the pilots and their departure was correct. In two instances we were unable to contact the pilot as the violation occurred during departure.

Three other flights resulted in reports from our neighbors, but the officer on the pad observed all three to be within acceptable parameters.

Please pass on to our neighbors that if they have questions or concerns about a specific helicopter flight, they should feel free to contact me through BUMC Security at 694-6533.
